III. Information received from Governments on military holdings and procurement through national production

Belgium

In paragraph 2 of the annex to its resolution 46/36, the General Assembly identifies the following seven categories of equipment for which Member States are requested to provide data for the Register: battle tanks, armoured combat vehicles, large-calibre artillery systems, combat aircraft, attack helicopters, warships and missiles or missile systems.

(a) Battle tanks

Tracked or wheeled self-propelled armoured fighting vehicles with high cross-country mobility and a high level of self-protection, weighing at least 16.5 metric tons unladen weight, with a high muzzle velocity direct fire main gun of at least 75 millimetres calibre.

Belgian equipment: Leopard I 106

(b) Armoured combat vehicles

Tracked, semi-tracked or wheeled self-propelled vehicles, with armoured protection and cross-country capability, either: (a) designed and equipped to transport a squad of four or more infantrymen, or (b) armed with an integral or organic weapon of at least 12.5 millimetres calibre or a missile launcher.

Belgian equipment:

M-113	57
Pandur	46
YPR-765	67
YPR-765 (25 mm)	46
YPR-765 (Milan)	53
Piranha III	72
Piranha III DF 90	9
Piranha III DF 30	12
Scimitar	6
Total	**368**

(c) Large-calibre artillery systems

Guns, howitzers, artillery pieces, combining the characteristics of a gun or a howitzer, mortars or multiple-launch rocket systems, capable of engaging surface targets by delivering primarily indirect fire, with a calibre of 75 millimetres and above.

Belgian equipment:

M-101	3
LG1 MK2	14
M-109	64
Mor RTF1	52
Total	**133**

(d) Combat aircraft

Fixed-wing or variable-geometry wing aircraft designed, equipped or modified to engage targets by employing guided missiles, unguided rockets, bombs, guns, cannons or other weapons of destruction, including versions of these aircraft which perform specialized electronic warfare, suppression of air defence or reconnaissance missions. The term "combat aircraft" does not include primary trainer aircraft, unless designed, equipped or modified as described above.

Belgian equipment:

F-16	76
Mirage V	1
Total	**77**

(e) Attack helicopters

Rotary-wing aircraft designed, equipped or modified to engage targets by employing guided or unguided anti-armour, air-to-surface, air-to-subsurface, or air-to-air weapons and equipped with an integrated fire control and aiming system for these weapons, including versions of these aircraft which perform specialized reconnaissance or electronic warfare missions.

Belgian equipment: A-109 Hirundo 31

(f) Warships

Vessels or submarines armed and equipped for military use with a standard displacement of 500 metric tons or above, and those with a standard displacement of less than 500 metric tons, equipped for launching missiles with a range of at least 25 kilometres or torpedoes with similar range.

Belgian equipment:

M class frigate	2
Tripartite class minehunter	6
Support ship	1
Total	**9**

(g) Missiles and missile launchers

(i) Guided or unguided rockets, ballistic or cruise missiles capable of delivering a warhead or weapon of destruction to a range of at least 25 kilometres, and means designed or modified specifically for launching such missiles or rockets, if not covered by categories I through VI. For the purpose of the Register, this subcategory includes remotely piloted vehicl s with the characteristics for missiles as defined above but does not include ground-to-air missiles.

Belgian equipment:

Harpoon	8
Sea Sparrow	37
Total	**45**

(ii) Man-Portable Air-Defence Systems (MANPADS).

Belgian equipment: Mistral 45

Denmark

Military procurement

Category (I-VII)	*Description of item*	*Number of items*
I. Battle tanks	Leopard 1	7
	Leopard 2	56
II. Armoured combat vehicles	M113	91
	M113G3	97
	M113G3L	62
	Piranha III	88
	CV9035	45
III. Large calibre artillery systems	155 mm M109	24
	105 mm M101	6
	120 mm Mortar M/10 (K6B1)	20
	227 mm MLRS	12
IV. Combat aircraft	F-16	62
V. Attack helicopters	Fennec	12
VI. Warships	(1) Surface warships	8
	(a) Absalon-Class Command Support Ship	2
	(b) Thetis-Class Multi-Role Frigate	4
	(c) Knud Rasmussen-Class Arctic Patrol Ship	2
VII. Missiles and missile launchers	N/A	

Note: "Nil" report on procurement through national production.

Remarks:

I. 72 Battle tanks. 140 BT Leopard 1 have been destroyed. 6 BT Leopard 1 and 8 Leopard 2 are decommissioned and retained in storage awaiting disposal.

II. 383 Armoured combat vehicles. The total holdings also include 11 ACV with TOW antitank guided missile launchers awaiting disposal.

III. 62 large calibre artillery systems. Twenty 120 mm mortars M10 entered service in 2010. The 12 pieces of 227 mm MLRS are not operational.

IV. 62 combat aircraft. Forty-eight F-16s are operational; remaining aircraft are stored surplus.

V. 12 attack helicopters. Used in an unarmoured support role; only 8 are operational.

VI. Eight warships. Niels Juel-Class frigates have been decommissioned.

VII. Missile/missile launcher.

Views received from Governments

Israel

Background information

Israel welcomes the continued operation of the United Nations Register of Conventional Arms and the efforts made by the United Nations and member States of the Register to take this significant measure for confidence, trust and security building between States, as relevant and universal as possible, taking into account national, regional and global security concerns of all.

Convinced of the importance of reporting to the Register and the Register's contribution to regional and global stability and security, Israel has reported annually to the Register in accordance with its categories on the major conventional arms, since its foundation in 1992. Israel's policy in reporting conventional arms transfers is that of the departure or arrival of relevant military equipment from or to areas under its jurisdiction.

Israel believes that the universality of the Register should be consolidated through outreach to States in regions of concern, such as the Middle East, with the goal of bringing on board those States that do not currently report. This goal should be a priority for the Register. In our view, the Register should remain simple, focused and relevant to the aim to achieve through such confidence and security-building measures more openness, indicate peaceful intentions and support the establishment of good neighbour relations and the avoidance of an unnecessary and miscalculated arms race.

Israel supports multilateral and bilateral initiatives to eradicate the illicit trafficking and proliferation of conventional weapons in all forms, especially from areas under weak jurisdiction and control of competent authorities. Israel faces daily attacks by terrorist organizations targeting intentionally its civilian population and civilian objectives, including its civil aviation.

We urge member States of the Register to focus on preventive measures against terrorism. In this regard, special attention should be accorded to the illicit trade in and trafficking of weapons and munitions such as man-portable air defence system, short-range rockets and improvised explosive devices. Effective steps should be taken to prevent the illicit trafficking of the launching systems, munitions and critical ingredients for the explosives' construction.

In the arms control arena, which supplements the efforts made by the international community on the Register, Israel actively participates in the international negotiations on the enlargement of the Convention on Prohibitions or Restrictions of the Use of Certain Conventional Weapons to deal with the humanitarian problems caused by the indiscriminate and irresponsible use of certain conventional weapons as it did on anti-personnel landmines, blinding lasers, anti-tank/vehicle landmines, explosive remnants of war and other munitions including cluster munitions in all its aspects. Israel, being a party to the Convention, also maintains its unilateral moratorium on all sales, exports and transfers of any anti-personnel landmines now in force until July 2014. Israel also participates in the

preparatory consultations that will lead to the negotiations of a future arms trade treaty in 2012.

Israel views the illicit trade in small arms and light weapons, in all its aspects, and their use by unauthorized recipients, including terrorists, as an imminent threat to security and stability, which affects and harms civilian populations and societies. Such illicit trade also negatively affects development and post-conflict reconstruction and rehabilitation. In this regard, Israel took part in the negotiations of the working group under the United Nations programme of action on tracing illicit small arms and light weapons and follows the operational guidelines of the international instrument adopted by the General Assembly in December 2005, to enable States to identify and trace, in a timely and reliable manner, illicit small arms and light weapons. Israel has also called, inter alia, within the context of an arms trade treaty, for the creation of a clear and comprehensive norm which would prohibit the transfer of arms to terrorists.

In 2007 Israel upgraded its legal instruments governing national defence export controls by enacting a new Defence Export Control Act. Among other changes to existing legislation, the new Defence Export Control Act adopts the Wassenaar Arrangement control lists, upgrades and formalizes the close consultation process between relevant authorities (Ministry of Defense, Ministry of Foreign Affairs (MFA) and Ministry of Industry, Trade and Labour) and enforcement mechanisms. Israel's competent authorities continue their outreach to defence industries to assimilate knowledge of the relevant regulations of the law.

Pursuant to its comprehensive export control legislation and regulations, Israel controls very closely transfers of arms, military technology, related services and dual-use items. In view of the specific threat, and following the principles of the Wassenaar Arrangement, Israel closely controls man-portable air defence system in all its aspects (as adopted by the Wassenaar Arrangement plenary in December 2003).

Furthermore, Israel's conventional arms transfer policy puts several major restrictions and prohibitions on arms transfers, including on small arms and light weapons and their munitions. Restrictions and prohibitions are applied in decisions to approve or deny marketing and export licences. These include, inter alia, considerations such as restrictions deriving from compliance with relevant arms control treaties and from Israel's adherence to export control regimes, compliance with resolutions of the Security Council, prohibitions on export to non-State actors, as well as to subversive and underground groups and to places where there is imminent risk that arms might be internally diverted, illicitly proliferated and retransferred or fall into the hands of terrorists or entities and States that support or sponsor them.

Israel's strategic situation in the region, which is facing now a very problematic period in its security, and the continuous lack of reciprocity in military transparency and openness from its neighbouring countries, makes it very difficult for Israel to support the enlargement of the Register to also apply to military holdings and procurement through national production. Even more so, it is premature for Israel, at this stage, to support any advanced military transparency such as the adjustments to the existing seven categories of the Register to include power projection capabilities and force multipliers or information on transfers of military technology.

Israel supports the principle of gradual exchange of information in military affairs; starting with regional responding on an annual basis to the present Register of Conventional Arms and then evolving, based on sustainable improvement in the security environment, into a more advanced transparency concept, as appropriate and necessary, within the framework of confidence and security-building measures in the region.

Advanced transparency that would encompass military holdings and indigenous production capabilities, or force projection and multipliers as well as advanced military technology can only prove stabilizing if established within the framework of the regional security and arms control regimes, mutually verified and based on the respected principles of reciprocity and comprehensiveness, and normalization of political-military relations.
